I am extremely concerned about the negative impacts of the proposed Atlantic Coast Pipeline. DEQ is responsible for protecting our natural resources but has not reviewed all of the potential impacts on our public resources. And they haven't even evaluated the limited and misleading economic information sent by ACP, LLC following DEQ's "additional information request."

The governor MUST call for more public hearings, (at least 3 sites distributed along the pipeline corridor) to collect input on a project that could harm our communities for decades to come.

I urge Governor Cooper to require DEQ to hold public hearings on the additional information submitted by the ACP.

Thank you,

Dave Walsh
